CONTENTS

Volume 33, Issue Nos. 1–8 (2000)

International Journal for
NUMERICAL METHODS IN FLUIDS

Issue No. 1, 15 May

Enhancement of the momentum interpolation method on non-staggered grids: J. Papageorgakopoulos, G. Arampatzis, D. Assimacopoulos and N. C. Markatos .. 1

A new numerical study of the shock/boundary-layer interaction: Yiqing Shen, Ruquan Wang and Hongzhi Liao 23

Two-dimensional dam break flow simulation: P. Brufau and P. Garcia-Navarro 35

A Legendre-spectral element method for flow and heat transfer about an accelerating droplet: Seyoung Oh, Hoa D. Nguyen and Suengho Paik 59

Control functions and grid qualities measurements in the elliptic grid generation around arbitrary surfaces: Sungcho Kim 81

Algebraic-hyperbolic grid generation with precise control of intersection of angles: K.-H. Brakhage and S. Muller 89

Accuracy and stability of a set of free-surface time-domain boundary element models based on B-splines: B. Büchmann 125

Issue No. 2, 30 May

Dynamics of a small bubble in a compressible fluid: A. A. Aganin 157

Depth-averaged two-dimensional curvilinear explicit finite analytic model for open-channel flows: Chih-Tsung Hsu, Keh-Chia Yeh and Jinn-Chuang Yang 175

The capturing of free surfaces in incompressible multi-fluid flows: Dartzi Pan and Chih-Hao Chang 203

A matrix-free preconditioned Newton/GMRES method for unsteady Navier-Stokes solutions: Ning Qin, D. K. Ludlow and S. T. Shaw 223

Evaluation of some high-order shock capturing schemes for direct numerical simulation of unsteady two-dimensional free flows: C. Tenaud, E. Garnier and P. Sagaut 249

Natural convection in porous media – dual reciprocity boundary element method solution of the Darcy model: B. Šarler, D. Gobin, B. Goyeau, J. Perko and H. Power 279

Indexed or abstracted by 'Applied Mechanics Reviews', 'BHRA Fluid Engineering Centre', 'Cambridge Scientific Abstracts', 'Chemical Abstracts Service', 'Compumath Citation Index Institute for Scientific Information (ISI)', 'Current Contents (CC)/Eng, Tech & Applied Sciences', 'Ei COMPENDEX PLUS', 'Ei Page One', 'Engineering Index', 'Eng. Societies Library', 'Fluidex (Elsevier)', 'Geobase (Elsevier)', 'Geographical Abstracts: Physical Geography', 'Geological Abstracts', 'INSPEC', 'International Aerospace Abstracts & Database (AIAA)', 'Mathematical Reviews', 'Mechanics', Research Alert (ISI)', 'SCISEARCH Database (ISI)', and 'Zentralblatt für Mathematik'.

Issue No. 3, 15 June

Robustness versus accuracy in shock-wave computations: J. Gressier and J.-M. Moschetta 313

Simulating surface tension with smoothed particle hydrodynamics: J. P. Morris 333

A pressure-based unstructured grid method for all-speed flows: Fue-Sang Lien 355

A finite element method for free surface flows of incompressible fluids in three dimensions. Part I. Boundary fitted mesh motion: R. A. Cairncross, P. R. Schunk, T. A. Baer, R. R. Rao and P. A. Sackinger 375

A finite element method for free surface flows of incompressible fluids in three dimensions. Part II. Dynamic wetting lines: T. A. Baer, R. A. Cairncross, P. R. Schunk, R. R. Rao and P. A. Sackinger 405

Exponential spline interpolation in characteristic based scheme for solving the advective-diffusion equation: C. Zoppou, S. Roberts and R. J. Renka 429

Issue No. 4, 30 June

Numerical performance of smoothers in coupled multigrid methods for the parallel solution of the incompressible Navier–Stokes equations: V. John and L. Tobiska .. 453

Numerical simulation and analysis of three-dimensional turbulent impinging square twin-jet flow field with no-crossflow: Shua-Hao Chuang and Tsu-Jui Nieh 475

On simulation of outflow boundary conditions in finite difference calculations for incompressible fluid: M. A. Ol'shanskii and V. M. Staroverov 499

Control of Navier–Stokes equations by means of mode reduction: Hung-Mok Park and M. W. Lee 535

A boundary-only approach to the deformation of a shear-thinning drop in extensional Newtonian flow: R. E. Khayat 559

The anti-dissipative, non-monotone behavior of Petrov–Galerkin upwinding: S. F. Bradford and N. D. Katopodes 583

Issue No. 5, 15 July

Numerical simulation of confined laminar jet flows: A. S. R. Sarma, T. Sundararajan and V. Ramjee 609

Non-linear analysis of solid propellant burning rate behavior: Junye Wang 627

Absorbing boundary technique for open channel flows: S. A. Yost, P. Rao and R. M. Brown 641

A fast nested multi-grid viscous flow solver for adaptive Cartesian/Quad grids: Z. J. Wang 657

Large eddy simulation of fully developed turbulent flow in a rotating pipe: Zhiyin Yang 681

A two-scale low-Reynolds number turbulence model: Shenq-Yuh Jaw and R. R. Hwang 695

Compact high-resolution algorithms for time-dependent advection on unstructured grids: M. E. Hubbard and P. L. Roe 711

A nodal-based implementation of a stabilized finite element method for incompressible flow problems: R. Codina 737

Issue No. 6, 30 July

High order ILU preconditioners for CFD problems: A. Chapman, Y. Saad and L. Wigton 767

The Lagrange–Galerkin Method for the two-dimensional shallow water equations on adaptive grids: F. X. Giraldo 789

A modified finite element method for determining equilibrium capillary surfaces of liquids with specified volumes: N. J. Nigro, B. P. Zellmer, Dongkai Shangguan and P. S. Lee 833

An adaptive boundary element approach to transient free surface flow as applied to injection molding: R. E. Khayat, W. Elsin and K. Kim 847

Prediction of turbulent oscillatory flows in complex systems: P. G. Tucker 869

Stretched Cartesian grids for solution of the incompressible Navier–Stokes equations: E. J. Avital, N. D. Sandham and K. H. Luo 897

Issue No. 7, 15 August

A fully automated Chimera methodology for multiple moving body problems: Z. J. Wang and V. Parthasarathy 919

Finite difference scheme for the solution of fluid flow problems on non-staggered grids: I. E. Barton and R. Kirby 939

Simulation of coating flows with slip effects: V. Ngamaramvaranggul and M. F. Webster 961

Computation of free surface flows with a Taylor–Galerkin/pressure-correction algorithm: V. Ngamaramvaranggul and M. F. Webster 993

The Krylov accelerated SIMPLE(R) method for flow problems in industrial furnaces: K. C. Vuik, A. Saghir and G. P. Boerstoel 1027

Wind-driven currents in a sea with a variable eddy viscosity calculated via a Sinc–Galerkin technique: D. F. Winter, K. L. Bowers and J. Lund 1041

Issue No. 8, 30 August

ANNOUNCEMENT iii

The basic character of five two-phase flow model equation sets: W. H. Lee and R. W. Lyczkowski 1075

The steady annular extrusion of a Newtonian liquid under gravity and surface tension: K. Housiadas, G. Georgiou and J. Tsamopoulos 1099

Calculation of compressible flows about complex moving geometries using a three-dimensional Cartesian cut cell method: G. Yang, D. M. Causon and D. M. Ingram .. 1121
